

96 WELL PLATE POSITIVE PRESSURE MANIFOLD

61

- Small instrument footprint (9" x 9" x 14") does not take up valuable bench space
- Accommodates a wide range of commercially available 96 well plates
- Works with both 96 and 48 well plates
- Restrictor plate allows even gas flow across all 96 wells – even when some positions are empty
- Two gas flow regulators on the front panel – one high flow regulator used for sorbent bed drying and one low flow regulator used for sample loading, washing, and eluting
- Positive pressure is well suited for viscous sample matrices
- Instrument gas regulator on the back can be set and locked into place
- Gas Supply: N₂ or compressed air regulated to 40 – 45 psi and filtered to 10 μm
- All pneumatic – only a gas supply is needed, there are no electrical connections
